

Point of Sale

Release Update v1.11.301 – April 8, 2025

New + Improved

Sale Weighted Items as OZ

We're happy to announce that we integrated with the Star Micronics MG-S8200 scale to support the ability to weigh and sell items by the ounce. When this scale is setup to register weight by the oz, the point-of-sale and the customer facing display will automatically change to display "oz" instead of lb. The sales receipt will display "oz" when an item was weighed in ounces.

The Star Micronics MG-S8200 can be setup to use either pounds or ounces, and the point-of-sale and customer facing display the correct unit of measure.

The point-of-sale will automatically default to read and display the weight as pounds, when no scale is connected, or any other integrated scale is used.
