

# Point of Sale

## Release Update v1.11.363 – September 3, 2025

### New + Improved

---

#### Weighing Items

In effort to create some consistency, the point of sale will now display up to the 3<sup>rd</sup> decimal for all weighed items, regardless of whether an integrated scale was used or the weight was manually entered. If the scale being used does not read to the 2<sup>nd</sup> or 3<sup>rd</sup> decimal, the point of sale will display them as 0.

In addition to this, we've made it possible to set pre-defined tare weights to the 3<sup>rd</sup> decimal as well. Pre-defined tare weights can be setup in your OrderDog online account on the point of sales settings page.
