Point of Sale
Release Update v1.11.400 – January 16, 2026
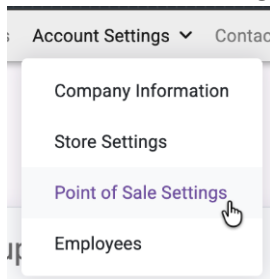

New + Improved

**EBT Payment Includes Bottle Deposits**

We've incorporated a new setting that gives a store the option to have EBT payments include or exclude bottle deposits. The setting is defaulted as disabled, but if you want bottle deposits to be included in EBT payments, then please do the following to enable the new setting:

1. Login to your OrderDog online account
2. Go to the Point of Sale Settings page

   a.

3. Select the Bottle Deposit Payments section
4. Check the Enable EBT payment on bottle deposit setting

   a.

5. Select Save Changes button
6. Go to the sync screen on your point-of-sale terminals and select the Sync All Now button
7. That's it!

**Print Barcode Labels in Large Type 2 Barcode Format**

We've incorporated the ability to create barcode labels on the point-of-sale using the large type 2 barcode format. It's important to note that you'll only be able to create and scan type 2 barcodes in the same format. You will not be able to print type 2 barcodes in small and then scan them using the large format and vice versa. We can support the ability for you to choose to print and scan using one of the following, but not at the same time:

- Small Type 2 Format: embeds small price in barcode, ex: $12.34 (cannot exceed $99.99)
- Large Type 2 Format: embeds large price in barcode, ex: $123.45 (cannot exceed $999.99)

If you're not using our new print barcode label printer for your deli/grab n go items, please reach out to our fantastic sales team at sales@orderdog.com to get all the details on what this incredible printer can do for you.
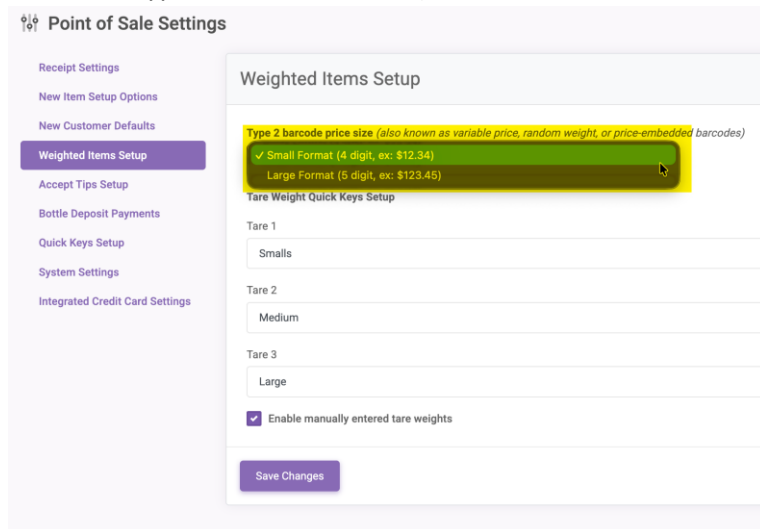

To select the desired type 2 barcode format, please do the following (must have our new barcode label printer setup):

1. Login to your OrderDog online account
2. Go to the Point of Sale Settings page
   a.
3. Select the Weighted Items Setup
4. Select the desired Type 2 Barcode Format (it's defaulted to the small format)
   a.
5. Select Save Changes button
6. Go to the sync screen on your point-of-sale terminals and select the Sync All Now button
7. That's it!
