

Point of Sale

Release Update v1.11.409 – January 27, 2026

New + Improved

Updated SaveNaturally Sync Process

We've incorporated a new process to help ensure SaveNaturally coupons are synced successfully with SaveNaturally. If there is ever a time when a receipt with SaveNaturally coupons fails to successfully sync with SaveNaturally, then it will retry up to 5 times. If it continues to fail each time, then our fantastic support team will receive an alert notification, so they can communicate directly with SaveNaturally the details to ensure the coupons are confirmed ("committed") in SaveNaturally's system. This new process will help ensure that when a SaveNaturally coupon is recorded in OrderDog, it will also be successfully recorded in SaveNaturally to be reimbursed through them.
