

Point of Sale

Release Update v1.11.357 – August 6, 2025

New + Improved

Weighing Items in OZ

We're excited to announce that the point of sale can read weight in ounces. If either one of the following scales are set to read weight in ounces, then the point of sale will automatically switch to read the weight in ounces as well:

- Star Micronics MG-T30:
 - Max weight: 480 oz
 - Min weight: 0.1 oz
 - Increments in weight by 0.1 oz
- Star Micronics MG-T12:
 - Max weight: 192 oz
 - Min weight: 0.05 oz
 - Increments in weight by 0.05 oz

It's important to note that the scales above can be set to weight in pounds or ounces. Whichever unit of measure the scale is set to, the point of sale will reflect it.
