Release Update – May 6, 2025

New + Improved

Fresh New Log In Page

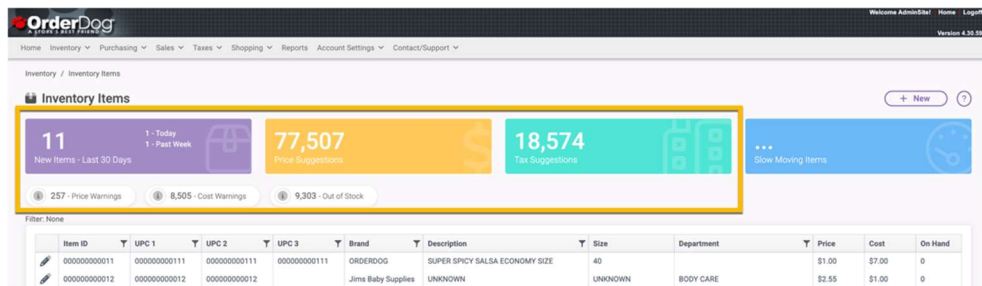

We're happy to announce that the log in page has been updated with a fresh new look. In addition to a new look, some features have been added to create a better experience:

- Made it easier to contact us when help is needed by providing our support email and phone. Selecting the phone number while using a mobile phone will automatically prompt to call us.
- Resetting a forgotten password is simple. Just select the "Forgot Password" option. You'll need your username, so an email with a reset password link is sent to the email address that's tied to it. Selecting the link will guide you to the reset password page to create a new password.
- For additional layers of security and visibility:
 - the password reset link is disabled once the password has been successfully changed,
 - and a confirmation email is sent whenever it has been changed.

Inventory Items Page

We've updated all the dashboard widgets on the Inventory Items page to exclude deleted items from the counts.

| Item ID | UPC 1 | UPC 2 | UPC 3 | Brand | Description | Size | Department | Price | Cost | On Hand |
|--------------|--------------|--------------|--------------|--------------------|--------------------------------|---------|------------|--------|--------|---------|
