Release Update v4.31.13– August 27, 2025

New + Improved

Price Suggestions (a new look)

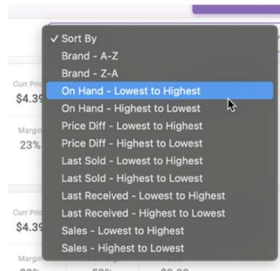

We're incredibly excited to announce that the price suggestions page has been updated to make it easier than ever to approve price changes. The page has been organized to make it quicker and easier to find the desired group of items with price changes, and to approve those changes in bulk. In addition to making it easier to approve price changes, more visibility has been provided in effort to empower you to make the right decision when approving the price changes.

Below are some of the highlights that the price suggestions page offers:

- Accept All – ability to approve price changes for multiple items at the same time
- More visibility into each item, such as:
 - Date item was last sold
 - How many were sold in last 6 months
 - Current on-hand
 - Date last received it in
 - Current Price
 - Cost
 - Current Margin
 - Suggested Price – new price if it's approved, it's based on the price rule
 - New Margin – what the margin would be if the suggested price is approved to be the new price
 - Price Difference – the dollar difference between the current price and suggested price (a great way to see how much the price would change if approved)

-
- More sorting options, such as:
 - Brand
 - On Hand Qty
 - Price Difference – the difference between the current price and the suggested price
 - Last Sold Date
 - Last Received Date
 - Sales Qty (in last 6 months)
- Multiple filters can be used to find the desired group of items to approve price changes for, the available filters are:
 - Price Difference: used to filter items based on price difference between the current price and suggested price
 - Whether items are in stock or out of stock
 - Based on recent sales (sold or not sold in the last 6 months)
